Everything's fine
in your living spaces!

QChalet

Your living spaces
in your hands.

QChalet offers safety for your living spaces – at any time & everywhere!

Stay informed and be safe

You want to be sure at any time and at any place that everything's fine in your apartment, your office or your holiday house? You want to get informed when the room temperature is sinking, the fire alarm is going off or something is moving in your living spaces? Using the QApp QChalet, QGate informs you via text message or e-mail about incidents in your living spaces – anytime & everywhere!

QGate connects your smartphone to your living spaces and informs you immediately when something's wrong. Plug in your QGate, register at www.qgate.com, download the QApp QChalet and feel safe!

Keep the overview

By using QApps QGate enables you to communicate with your electrical devices via smartphone, tablet or web browser and get informed by them. Experience a new feeling of safety with the QChalet advantages:

- Easy handling
- Information via text message or e-mail
- Room temperature control
- Frost control
- Non-contact door switch - QLink (available 2013)
- Presence simulation
- Detection of acoustic activities

And that's how it works

Plug your QGate into the next socket and connect a light source (presence simulation) or the radiant heater (frost control, room temperature control) to it, register at www.qgate.com, place the QLink (e.g. at your entrance door), download the QApp QChalet and adjust everything to your personal safety needs.

QGate communicates via GSM (free SIM-card included) with your smartphone. QGate does not require WLAN-installations or a landline. Plug in, register and feel safe with QGate.

Further information www.qgate.com

Quick Guide

Plug your QGate into the next socket.

Go to www.qgate.com and register your QGate using the enclosed QGate SN and Key.

Deposit your phone number or e-mail address so that QGate can forward messages to you.

Tag the QLink for example to your entrance or bedroom door, your window or a drawer.

Download the QApp QChalet and connect a light source or the radiant heater to your QGate. Adjust everything to your personal safety needs.
